Message from the Board

„It only takes as long to wash your hands well as it takes twice to sing 'Happy Birthday'.”

(Ignaz Semmelweis, widely regarded as discoverer of the clinical benefits of handwashing)

Dear patrons, dear followers, dear staff and colleagues, dear volunteers!

We are extremely pleased to present you with our sixth annual performance and financial report. We hope that you and your beloved ones are well, physically and mentally unscathed by the tumultuous events around us.

How should we characterize the year 2020 from a Kamboo Project point of view? Well, to start with, it was surprisingly steady and went according to the plan set out at the end of 2019. Our employees, who had to work in a home office mode from January to mid-March 2020, are all healthy. That all in itself is good news for our organization. That said, the pandemic has added to the hardship for many

Cambodians, especially in rural areas. Schools were closed for much of 2020, which meant training possibilities (for hygiene) were limited, and which forced us to visit our students at their homes. We did so by adhering to the strictest safety standards. There was a bright sight of the coin to this: we were able not only to reach students, but their entire families. Consequently, we have touched base with a record number of citizens in 2020, mainly through our hygiene services and our “Emergency Care Packages”. Never has a training for a proper handwash had more enthusiastic response from parents, worried about the safety and sanity of their children, than in this era dictated by invisible disruptors.

We completed a record six projects. We took the time to intensify our regular follow-up visits for monitoring and evaluation of previously completed projects. We started a new programme, roll-out which is well underway. More of that a bit later...

The fact that we had an unprecedented amount of jobs and work with rural Cambodians shows in the composition of our team. Next to Mrs. Somalita Keo (third from left), who by the way has joined as Board Member in 2020, next to Mr. Pisey Chin (first from left), our trusted senior project manager, and next to Ms. Khan Ra (second from left), our long-time accountant, we

are welcoming Ms. Somnang Pin and Mr. Dy Vorn to the team. While Ms. Pin is taking care of media documentation and public relations, Mr. Vorn, on a temporary two-year-contract, is running our hygiene activities. Welcome Somnang! Welcome Dy!

Kamboos Project's Primary School Programme, until 2019, has primarily focused on infrastructure upgrade work such as installing sanitary facilities, repairing toilets, installing filter systems or renovating classrooms or entire school buildings. We have now tapped onto the next steppingstone in making all these efforts sustainable. Promoted by our 2019 co-sponsors, the Geberit Company and Kleine Hilfsaktion e.V., we have embarked on a WASH programme at two schools, which

we have called SHIP (School Hygiene Improvement Programme). Following an extensive period of research and preparatory work, this programme has started successfully with teacher and student participation. We plan to conduct this at a further four schools in 2021 and, successful funding provided, a further two schools in 2022, with more to come beyond that. We believe that this programme is essential to equip teachers, students and their families with best hygiene practices through workshops with our experts. We strive to

reduce infection rates, thereby increasing enrollment rates at schools and ultimately reduce illiteracy rates in the Prasat Bakong District. We therefore find ourselves fully aligned to Sustainable Development Goals 4 and 6 of the United Nations.

Last but not least, the figures: In the past year, we have reached out to 9 schools, almost 10'000 students and more than 38'000 citizens in rural Cambodia to provide services in our core areas of Education, Water and Sanitation and Sustainable Renovation. After a record year 2019, donations to Kamboo Project

remained at a high level, at just north of CHF 142'000. The ratio of project costs to total costs, which is so important for managing cash flows to Kamboo Project, reached 89%, comfortably exceeding our target 80% ratio for a third consecutive year.

Kamboo Project has commenced 2021 in good shape, especially given the external circumstances, and which are challenging, both for executing projects on time, and for fundraising. While small donations have practically fallen off the cliff, recurring donors, patrons as well as institutional sponsors have responded very well to our new hygiene programme "SHIP", developed by our local team. This multi-year programme is now fully funded through to the middle of 2022, and which allows for calm and considerate planning and visibility as to execution.

Many thanks to you, dear supporters and sponsors, for your trust in our mission! We will work even harder and smarter to earn your support in the future.

On behalf of the Board of Kamboo Project Switzerland and the team in Cambodia

A handwritten signature in blue ink, which appears to read "James G. H.", is written on the page.

Vision and Mission Statement

Cambodian women and men work together for an autonomous and secure future. We support them.

We are a young, results driven Swiss NGO of high integrity. Thanks to our project experience and passionate commitment, we ensure, in close cooperation with local partners, that donations and volunteer work support the people in Cambodia effectively and sustainably.

Where we operate

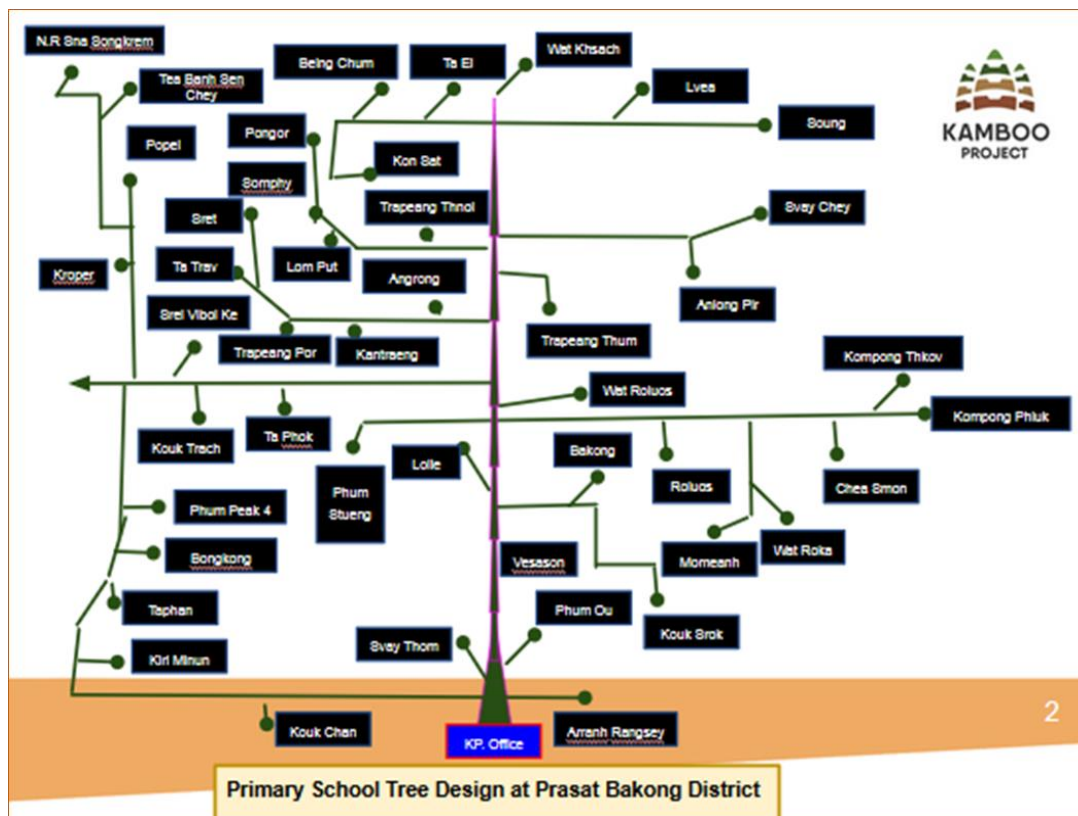

Kamboo Project is working in a specific district called Prasat Bakong District. Kamboo Project continues working in this area while also expanding to two districts call Svay Leu and Varin, and based on the identifiable needs and/or gaps of support from the public sector. Kamboo Project is working

with multiple schools in the Prasat Bakong District, promoting specific activities such as school infrastructure projects, hygiene training, student school materials and mobility enhancement projects.

Portfolio of Schools

The impact of Covid-19 on our operations

The SARS-Cov-2 derived pandemic defines our time as a time of what many experts agree is a global health crisis. This crisis has different regional consequences how people interact as families, but also how communities organize themselves. Social contracts between citizens and governing states are being reviewed under the pressure of the virus, even in the First World. In developing countries, this pandemic has affected economics particularly hard. Every day people are losing their jobs, are cut off from access to basic food, feed, infrastructure and sanitary commodities and families endure hardship as their already modest income is shrinking dramatically.

While Kamboo Project has also faced significant challenges with respect to new funding of smaller operations, we can fortunately say that our programmes are not endangered thanks to stable, loyal donors that provide long-term support. Our operations have continued uninterrupted in 2020 and into 2021. Of course, we had to make necessary adjustments such as home office and working with

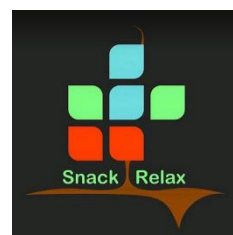

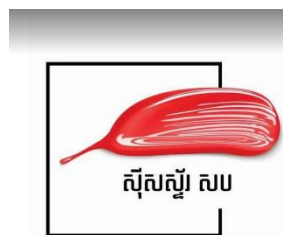

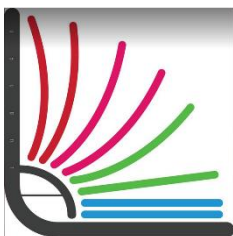

teachers and students in smaller groups. Also, schools have been closed for certain periods which has led to changes in project scheduling. We have listed our progress and achievements further below.

Besides our core activities, we have engaged in emergency help for a change. This as in 2020, we applied for and received a grant funding from *South East Asia Foundation* for this project. We have therefore been able to support more than 300 families of children from our network of schools with what we call our “Emergency Care Package Project”. Families and students have received one hand washing device, soapbox, facemask, 20kg of rice, one box of noodles,

two bottles of soy sauce, and two bottles of fish sauce. We think this is an excellent initiative to provide food supplies for school children and families in need. In line with our core activity of sanitary education, we also handed over portable hand washing equipment. We additionally hooked recipients of the package up for an extensive hygiene training, reaching school children and their family members at the same time. Parents are key for successful training while the children are at home and not in school because of the pandemic. Hand hygiene is a great way to prevent infections. We would like to extend our gratitude to the South East Asia Foundation for their critical support in these tough times for rural Cambodians.

Furthermore, although they struggled themselves, our growing network of small local business partners stood by Kamboo Project in 2020. These small entrepreneurs support us through donation boxes, placed at their facilities, raising awareness of our brand and reminding people to invest in their communities. Please also refer to our video [Community Support from Small Businesses](#).

Thank you for your steadfast support!

Performance Review: Programs/Projects

In 2020, we have reached the following directly impacted beneficiaries:

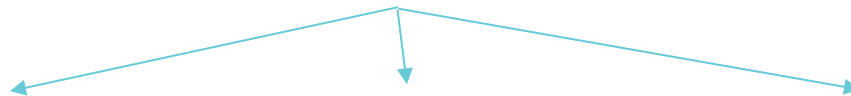

9 *Schools*

9674 *Students*

38040 *Citizens*

What We Do

Water and Sanitation

Construction and Renovation

Education

Kamboo Project focuses on three core areas: Water and Sanitation, Sustainable Construction and Renovation as well as Education. Since our foundation, we have been working along the lines of these core activities in two programs. Both programs touch on all three core areas at the same time. First, a program centered around disadvantaged primary schools. Second, our community development program. Both programs are subdivided (and budgeted) in new projects on the one hand side and monitoring and evaluation of existing or completed project work on the other hand.

The framework for our activities are the seventeen Sustainable Development Goals (SDGs) of the United Nations, more specifically two of them: *Sustainable Development Goal 4 (SDG 4)* is the education goal. It aims to “ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.” How does Kamboo Project support SDG 4?

4 QUALITY EDUCATION

- Build and renovate school buildings
- Provide school materials to children to fulfill the lack of school material
- Provide bicycles to children in rural areas.
- Promote education in the rural school
- Improve learning conditions for primary schools in rural areas
- Provide adequate space of school infrastructure at good standards
- Promote teaching quality by upgrading the physical facilities of schools
- Sustain community efforts in constructing and equipping primary schools by implementing school construction projects with community participation
- Introduce how to manage waste on the school ground and inside classrooms to Child Support Committee
- Provide necessary rubbish bins (recyclable, non-recyclable and organic)
- Build an incinerator/dump rubbish at a landfill site
- Construct/renovate school fences

Sustainable Development Goal 6 (SDG 6) is the sanitation goal. It aims to “ensure availability and sustainable management of water and sanitation for all.” How does Kamboo Project support SDG 6?

- Install or renovate drinking water system for primary schools
- Clean drinking water system regularly
- Water Quality Testing performed once a year
- Build or renovate toilets
- Clean toilet facilities regularly
- Provide hand washing facilities
- Repair and regularly maintain toilet facilities
- Set up a storage for toilet package
- Repair and regularly maintain hand washing facilities
- Set up storage for hand washing packages
- Clean hand washing facilities regularly
- Repair and regularly maintain drinking water systems
- Set up storage for drinking water system packages
- Provide hygiene supplies to families in the community
- Sustainably improve hygiene practice at primary schools
- Contribute to improving a healthy and safe learning environment for students

Highlights from projects initiated in 2020

Highlights Education

Initiation of “School Hygiene Improvement Program” (SHIP): Tailor-made Hygiene Programme for Primary Schools with quantifiable benefit over the long-term

Access to water, sanitation and hygiene (WASH) is a human right and a critical precondition for ensuring good health and well-being of school children. As an integral component of an inclusive and effective learning environment, access to WASH in schools maximizes educational outcomes. The United Nations 2030 Agenda for Sustainable Development – its critical

Sustainable Development importance of improving safe special attention to the needs a disability. Despite the recent years in providing however, a significant

Goals 4 and 6 highlight the WASH services, paying of girls and those living with significant progress made in WASH services to all, proportion of children in the

Siem Reap, Battambang and Banteay Meanchey Provinces of North Western Cambodia still spend their days in schools that do not provide basic WASH services, compromising their health and dignity. A survey conducted by the Cambodian Ministry of Rural Development (MRD) and UNICEF in the two provinces where Kamboo Project is active, 167 elementary and secondary schools alone are seriously affected by lack of drinking water, latrine dropout, lack of hand washing facilities and higher than average illiteracy rates, especially with girls. While we don't have data for our region, UNICEF estimates that, for all rural areas in Cambodia (which accounts for an estimated 76% of the population) only 41% of 11-18-year-old girls go to secondary school and continue to high school. Steered by the expertise of two visiting German environmental scientists, our local team has developed a Hygiene Programme, that we have started to roll out at two representative schools. This initial roll-out is being sponsored by the Singapore-headquartered branch of Swiss sanitary firm Geberit, but who are limiting their commitment to these two schools.

Packages of Emergency Care for disadvantaged students and their families

In the most severe cases, Kamboo Project is helping some selected students at our chosen schools not only with school supply and transportation, but also with food and hygiene material supply. Affected by Covid-19, many family members of our students lose their job and need hygiene to avoid the virus contamination, by washing hands. Our “Packages of Emergency Care” contain one package of rice, noodles, fish sauce, soy sauce, washing powder, and especially handwashing devices plus training at home.

Care packages and hygiene training for 30 students

Praah Neangkol village at Kompong Tom Province - Completed

Student mobility – bicycle projects – cooperation with Austrian market leader Woom

In 2020, despite closed schools for a considerable period of the year, we were still able to hand over bicycles to 30 students. The bike breaks crucial barriers. By cycling to and from school, the children have more energy and free time to learn. The bicycle allows more safety for female students than when having to walk from their home in the rural area. Here is what student Meta has to say:

“Having a bicycle makes it a lot easier. I have no longer get up very early in the morning and get sweet when I arrive home and no mud on my feed when the rainy season—especially having time to help my mom with a daily morning work routine like cleaning the house and opening the store.” We thank our partner, bicycle producer Woom, who have lent and will lend their generous support in 2020 and 2021. Please click on this to access the impact video from “Meta”: [Kleine Klingel, große Wirkung](#) 

Highlights Construction/Renovation

By the end of 2020, a total of 894 students in two primary schools had access to safer, more comfortable, better equipped and more hygienic school facilities.

Ta Ei Primary School

This project inspired the local teachers to contribute to fundraising through their own initiative, using their own network. It is particularly gratifying that 25% of the necessary

investment funds were collected and donated by school employees themselves, entirely in the spirit “help for self-help”. Ta Ei Primary School and Kamboo Project would like to thank Kleine Hilfsaktion e.V., as well as the Böttcher and Ehrensperger families from Germany and Switzerland,

respectively. Their generous financial support facilitated the installation of new roofs, floors, windows, doors, and walls. The students no longer have to learn dangerously under a leaking roof or on a holey classroom floor.

Message from the school headmaster:

“It was fortunate for our school that Kamboo Project could still make our dream come true. We have been waiting for this project to happen for a long time. The students are excited to see the new school after a long-time break because of the Covid-19 pandemic. Upgrading the school infrastructure also motivates the parents and

students to come to school. We can already see a tangible increase in the number of students enrolled at Ta Ei School for the next school year (started Nov 2020). Moreover, it encourages the teachers to continue renovating a second building by fundraising from communities and through the school budget. We are proud to work with Kamboo Project and the donor Kleine Hilfsaktion e.V. We wish you health and good luck.”

Chea Smon Primary School

In 2020, we were able to contribute to school infrastructure development at Chea Smon Primary School – which provides education for more than 600 students – as follows:

1. Two school buildings renovated (comprising ten classrooms), fixing the roof, including the roof system, improving the doors, windows, and floor, and repainting the classroom buildings.
2. Renovate toilet house (eight toilet rooms), fixing the entire toilet, repainting and fixing the feet, and install four urinals for male students.
3. Install fans and electric wiring for each room.
4. Renovate the warehouse: Replace the roof and wall and painting for both sides and install the window and door for lockable.
5. Renovate a teacher's office, create one big meeting room, and school principal office room so teachers can have some space for discussion on their teaching challenges.
6. Renovate the parking area for safety and gardening around the school for a fresh environment

Please see the video that our team made after the project was done. Please click on the like to access the video: [Chea Smon Renovation](#)

We want to express gratitude to our Swiss corporate sponsor (that prefers to stay anonymous) for making this fantastic work happen. Everyone at Chea Smon primary school – mostly all of its students were excited to see the upgraded, safer and more modern infrastructure when they returned to school in November after the summer break and Covid-lockdown.

Highlights Water and Sanitation

Kamboo Project still focuses on Water and Sanitation as part of both, the school as well as the community development programmes. The two schools - Arranh Rangsey and Wat Roka Primary Schools - that were supported by the “Geberit Social Project” in 2019 continue to be monitored and evaluated by our water and sanitation indicator protocol. The same applies to seven other schools, where we had previously (2017-19) carried out infrastructure work. While in 2017-19, we provided water towers with integrated filter system equipment that cleans the groundwater, our focus in 2020 was on water quality control, and spare part replacement.

We do the work to be a role model for the school and help them during the transition period towards managing water supply on their own and independently. We want to ensure, for several years to come, that water quality is within guidelines. In this context, we continue to help these schools through technical, training and financial support. We have come up with a plan for each of the schools to take over responsibility for water management after three years. To ensure a transition towards sustainable self-help, we have agreed that in year one, 100% of the maintenance fee will be carried by Bamboo Project. Our contribution will fall to 70%, in year two, and to 20% in year three, while in year the respective school council will be 100% responsible for maintenance costs related to the water towers and filters. Before handover of infrastructure and equipment to each school, the Bamboo Project team conducted several training sessions, instructing all teachers on usage and maintenance procedures.

Mr. Kham Borin of the Provincial Department of Education responsible for schools in the Prasat Bakong has been aligned to school and Kamboo Project activities all along. Without Geberit and Kamboo Project, says Mr. Borin, the development projects of the district schools would have taken much more time. At this point in time, all teachers at, for example, Arranh Rangsey Primary school are promoting and actively undertaking community fundraising initiatives to further improve school infrastructure. We extend our gratitude to Geberit for kickstarting this great series of school projects.

Input, output and impact of the projects initiated in 2020 in tables (English only)

Cycle for a better life – version three accomplished!

Sector Mission & Goals	Participants/Input	Output	Impact on local community

Finance Report/ Auditor's Report

Accounting – preliminary remarks

1. The present financial statements have been prepared in accordance with the provisions of Swiss law, in particular the articles on the commercial accounting and accounting of Swiss GAAP FER 21 for Non-Profit Organizations. Kamboo Project's fiscal year ends on December 31 of each reporting year.
2. In particular, the income statement is prepared according to the principle of gross accounting. As a result, fundraising expenses and the resulting donation income are not at all offset against each other.
3. For the period considered, all donations were non-dedicated and therefore freely available. There are no recurring donations (permanent standing orders) to be mentioned, nor any contributions from the public sector ("Public Private Partnerships"). There is currently no need for so-called Earmarked Fund Capital („zweckgebundenes Fondskapital“).
4. The last five financial statements, 2016 through to 2020, have been audited by our trustee, thv AG Aarau. From 2017, the income statement have been presented in accordance with the standards for Swiss aid organizations recommended by the ZEWO Foundation. The figures and accounts for 2015 were not audited but taken into consideration by our trustee, as they serve as year-over-year comparables for the 2016 accounts. The accounts for 2015 were prepared strictly along the lines of the same principles, rules and chart of accounts that were applied for those of 2016-2020. As such, Kamboo Project would like to relay trust in consistency of its accounting framework and financial reporting, and now for six consecutive years.
5. In addition to the financial statements for Switzerland, this report also details the operating accounts for our activities in Cambodia, our only foreign representation, and in particular an activity report designed to provide transparency for the use of funds transferred from Switzerland to Cambodia. The operating account was installed, monitored and validated by our local accounting department, and the reporting currency is USD. The chart of accounts between the two countries is fully aligned.
6. Kamboo Project has no participations held by or held in other associations or companies. Kamboo Project operates an office in Cambodia. This is predominantly – but not exclusively - financed by transferring funds from Kamboo Project Switzerland.

Appendix to the Annual Financial Statement of Kamboo Project Switzerland

Notes to the Income Statement:

E1: Transfer of funds to Kamboo Project Cambodia: A large majority of donations are received in Switzerland. On a regular basis funds are transferred to Kamboo Project in Cambodia, so projects can be implemented on the ground. The annual report provides detailed information on the use of these financial resources.

E2: Other operating expenses: Marketing, IT and donation acquisition are by and large carried out by Kamboo Project Switzerland. These expenses are invoiced in Switzerland. Board member Kim Thurnherr charged the association with IT service contracts of CHF 1053 (CHF 1388 in 2019) through his company KDT-Solutions. The board made sure in advance that KDT-Solutions offset market-competitive hourly rates.

E3: Tax: Since November 27, 2014, United Asia Charity is exempt from tax and donations are tax deductible. The renamed organization Kamboo Project has been exempt from tax since October 8, 2018 and the donations are tax-deductible.

Notes to the Balance Sheet:

B1: Capital of the Association: At the time of the balance sheet preparation, Kamboo Project only has so-called 'organizational capital' (non-dedicated, 'free' funds) and no 'fund capital' at all (third-party funding earmarked for specific use). In a meeting dated 16 December, 2020, the Board decided unanimously to strengthen the organizational capital by CHF 1'405.

A statement of Changes to called-up capital/equity according to Swiss GAAP FER 21 is not required at this time.

Excerpt: Auditor's Report (German only)

Bericht der Revisionsstelle zur eingeschränkten Revision

Als Revisionsstelle haben wir die Jahresrechnung (Bilanz, Erfolgsrechnung, Geldflussrechnung und Anhang) der Kamboo Project für das am 31. Dezember 2020 abgeschlossene Geschäftsjahr geprüft.

Für die Aufstellung der Jahresrechnung in Übereinstimmung mit Swiss GAAP FER, den gesetzlichen Vorschriften und den Statuten ist der Vorstand verantwortlich, während unsere Aufgabe darin besteht, die Jahresrechnung zu prüfen. Wir bestätigen, dass wir die gesetzlichen Anforderungen hinsichtlich Zulassung und Unabhängigkeit erfüllen.

Unsere Revision erfolgte nach dem Schweizer Standard zur Eingeschränkten Revision. Danach ist diese Revision so zu planen und durchzuführen, dass wesentliche Fehlaussagen in der Jahresrechnung erkannt werden. Eine eingeschränkte Revision umfasst hauptsächlich Befragungen und analytische Prüfungshandlungen sowie den Umständen angemessene Detailprüfungen der bei der geprüften Einheit vorhandenen Unterlagen. Dagegen sind Prüfungen der betrieblichen Abläufe und des internen Kontrollsystems sowie Befragungen und weitere Prüfungshandlungen zur Aufdeckung deliktischer Handlungen oder anderer Gesetzesverstösse nicht Bestandteil dieser Revision.

Bei unserer Revision sind wir nicht auf Sachverhalte gestossen, aus denen wir schliessen müssten, dass die Jahresrechnung kein den tatsächlichen Verhältnissen entsprechendes Bild der Vermögens-, Finanz-, und Ertragslage in Übereinstimmung mit Swiss GAAP FER vermittelt und nicht Gesetz und Statuten entspricht.

Marketing	6%	10%	2%	5%	2%
Admin	31%	7%	2%	6%	4%

Risk assessment

Financial risk

Kamboo Project might not be able to raise the required total amount for specific project commitments and thus lose funding in the form of funds or 'grants'. This can put at risk the continued functioning of the association.

Kamboo Project might err in budgeting, and effective project costs could significantly exceed projected costs. Cambodia currently has high rates of inflation in wages, rents, electricity and land ownership.

Kamboo Project might not have enough funds available in the form of free resources (e.g., membership fees, non-dedicated grants) to cover its fixed and overhead costs.

Operational risk

Kamboo Project might hire unqualified personnel in the context of assembling construction teams, which could lead to delays or even strikes.

Persistent monsoon storms (especially between July and September) might destroy essential infrastructure during project preparation, especially during early stages of a construction project.

The legal situation regarding land ownership in Cambodia is at times less transparent and Bamboo Project might not protect itself sufficiently against property confiscation. Bamboo Project has for the time being made a conscious decision not to acquire any land. According to local Property Law, the Khmer share of ownership in property must be at least 50.1% anyway.

Political risk

We firmly believe that we are prepared for economic headwinds since we are predominantly financed from abroad. We are also currently looking for partnerships with local grassroots organizations to mitigate risk. We are not, however, immune to any incipient acts of violence or unrest, and would have to postpone or cancel projects under such scenario.

Legal risk (licensing)

Kamboo Project has obtained a local license from the Ministry of Economy and Finance in Cambodia, while many other NGOs prefer the International License (to be issued by the Ministry of Foreign Affairs). Since 2017, legislators have been calling for more stringent requirements for the recertification, which is pending every three years. These requirements are accompanied by regular, strict controls. Many NGOs are therefore struggling with successful licensing and need to raise their internal processes and reporting, project and financial transparency to a higher level. This could also increase our administrative burden in Cambodia over time. In the worst case, Bamboo Project could lose critical local licenses if it violates local laws and policies.

We protect ourselves against this by establishing in 2017 a three-member board on site with a great deal of experience in financial supervision and government affairs. We also believe that we have established "best-in-class" local governance from the start. This was re-confirmed twice, most recently in February 2019.

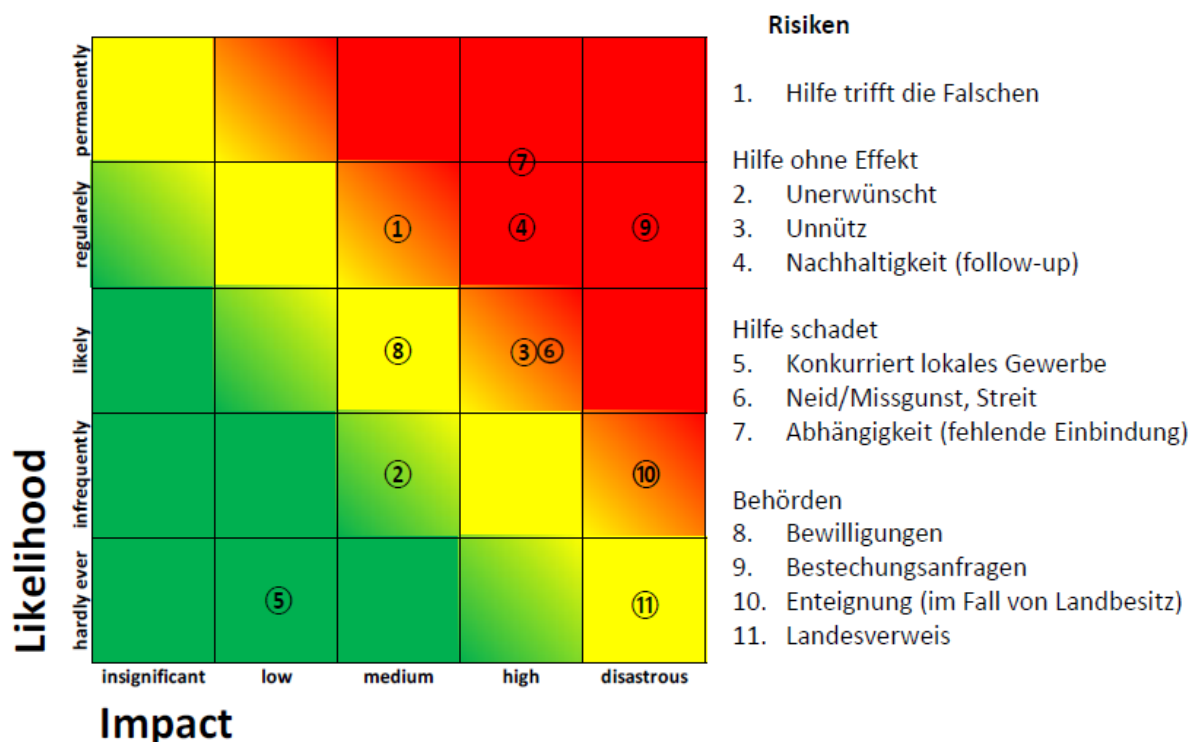

Risks specific to Kamboo Project

Kamboo Project might be deprived of critical local licenses if it violated laws and guidelines for NGOs.

Important employees might defect and join peer organizations or leave to enter into the commercial industry or may require longer absence period due to illness.

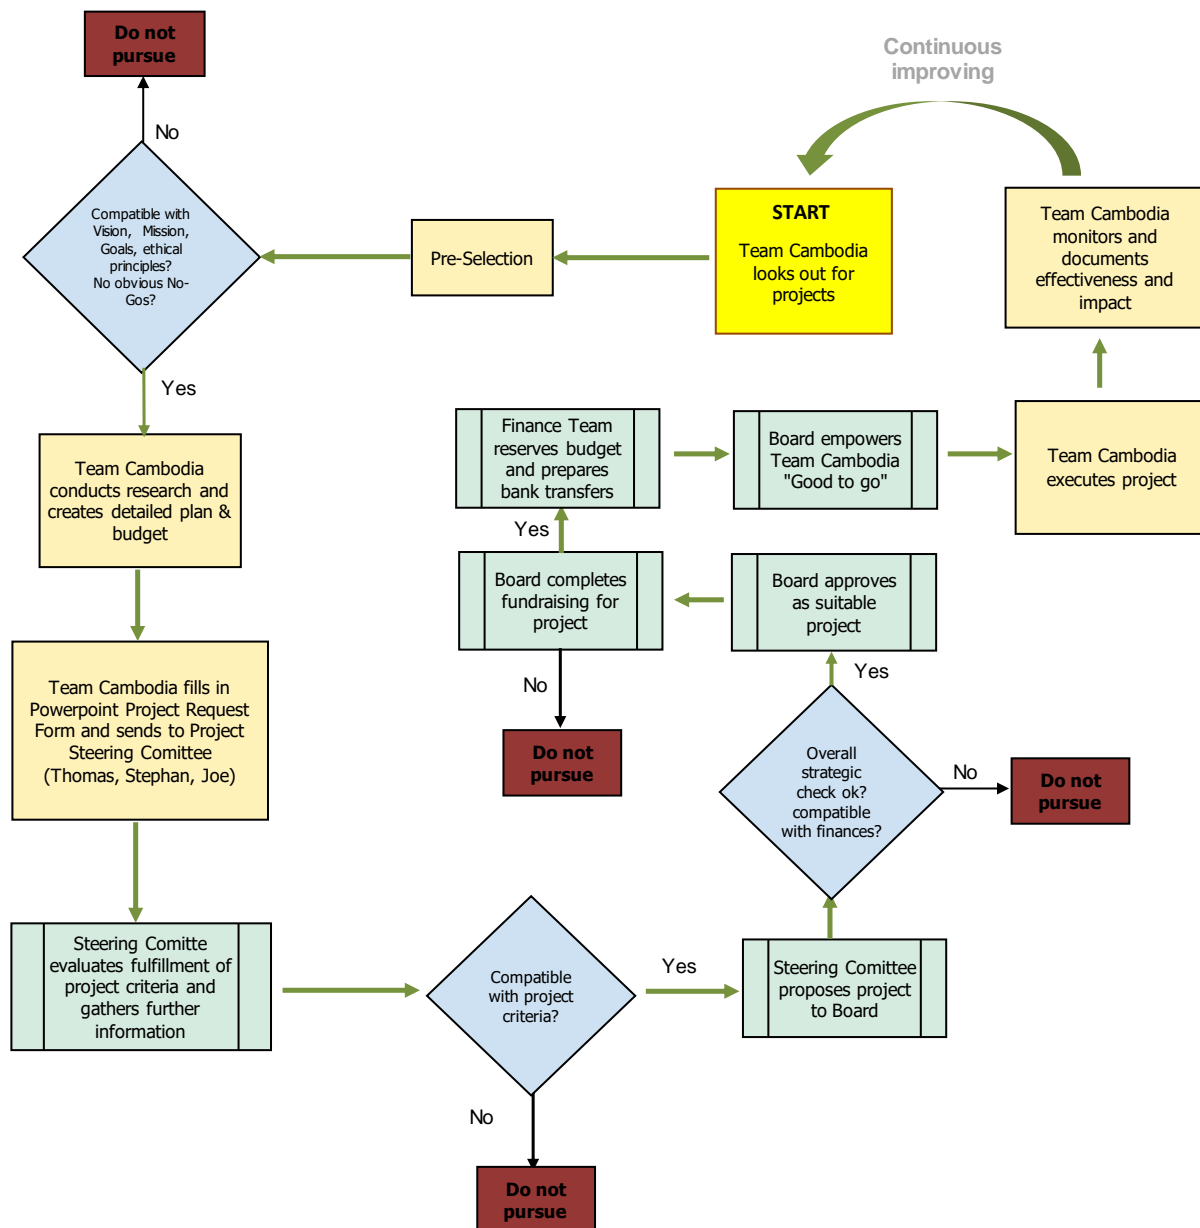

Kamboo Project could lose the trust of important stakeholders in projects: village citizens, village chiefs, teaching staff at schools, parents, collaborators, provincial authorities, donors, and many more.

Kamboo Project - risk prevention is a part of our DNA: permanent in-house evaluation

Source: Kamboo Project

Our project selection follows a concept developed by our local employees together with the Swiss Executive Board, to which we strictly adhere:

Source: Kamboo Project

Governance

Our organization and governance consist of two parts that complement each other. We manage project strategy, fundraising, administration and use of funding and donations, information technology, legal, finance and audit from Switzerland (headquarter: Zurich). Our operational center, including project management, liaison with authorities and voluntary work, is located in Siem Reap, Cambodia.

The highest body is the General Assembly, which was convened once in 2020, in accordance with the Articles. The Executive Board met six times in 2020.

The Executive Board consists of:

1. Thomas Gilbert (* 1971), Ph.D., President, is a trained natural scientist and high school teacher.
2. Kim Thurnherr (* 1992), Vice-President, is an IT service provider, self-employed and Managing Director of KDT-Solutions.
3. Stephan Lienin (* 1970), Ph.D., is a natural scientist, longtime corporate consultant for sustainability and co-founder of Sustainerv (Zurich, Boston).
4. Somalita Keo (* 1987), MBA, Country Manager of Kamboo Project in Cambodia. Somalita has a proven background in financial management, with ten+ years on-the-ground experience of the Cambodian NGO sector.
5. Joe Lang (* 1988) is employed as co-managing director of QualiClean GmbH.¹

¹ Joe Lang left the Management Board at 31 March 2021 at his own request and has since been replaced by Mr. Stefan Pfister (Davos, CH), who has worked in the NGO sector in Cambodia for more than ten years.

How to support Kamboo Project: donations, visits, volunteering

Donate with one of the payment processes provided below. We appreciate and welcome your contribution, even more so if you would like to specify the project or the project type that you want us to support on your behalf! Thank you very much, your Kamboo Project.

Financing concrete projects

1. You donate for a concrete project, which appeals most to you. See [Project Overview](#)
2. Your donation flows directly into the chosen project.
3. You monitor of the progress and sustainability of the projects online.
4. Even with what one would consider a 'moderate' one-time donation, you can help alleviate the sufferings of the rural population.

Become a patron / ongoing membership

1. Support Kamboo Project with an annual donation.
2. You can become a patron contributing from CHF 100 USD per year.
3. As a patron, you are measurably backing the build-up work of Kamboo Project and support the coverage of fixed costs in Cambodia (notably ongoing salaries and rent due)

Uncomplicated, immediate support

1. Donate quickly, safely and in an uncomplicated manner.
2. Your donation is used directly where it is most needed.
3. In the case of larger donations, you can contact us directly and discuss with us where exactly you would like us to deploy your funds.
4. We offer numerous ways to make a financial contribution: Post Finance, Bank Wire, Credit Card, PayPal, Ammado and The Charities Aid Foundation (Tax-free grants and donations out of the United Kingdom).

Volunteering and Internships.

For volunteering, please consult: [Get Involved!](#)

For internships, please consult: [Kamboo Project has rolled out an Internship Programme](#)

For further information on the different donation possibilities, please visit our website:

[We support Kamboo Project and Cambodia](#)

Philanthropists stopping by

Think of patrons who donate, but at the same time also provide hands-on aid. Donors who prefer to coordinate how their contribution is used, plus learn about the culture of an exciting, underrecognized part of Asia. It is also possible for you to visit our site at any time, to visit our work, and even to support projects. This way, you can see in action how and where the funds flow.

Our Cambodian office is located in the outskirts of Siem Reap (about 20 minutes by Tuk-Tuk from the airport // to the city center: less than 2 miles or 10 minutes by bike, 5-7 minutes by Tuk-Tuk, respectively). We offer guests the opportunity to stay overnight undisturbed and with respectful distance, yet be close to the team.
